The best Netgear is a reputable manfacterer router and other network device, with options from fairly standard two-band routers, gaming-centric tri-band routers, and full home mesh networks. What you need will depend on your space, how many devices you plan to connect, and your daily use. For a detailed overview of router options, take a look at our overall overview of the best routers. Otherwise, read on to see the best Netgear routers. What we like about fast speed Easy set Nice design What we don't like about Netgear's Orbi Mesh Wi-Fi is the company's first specially made eye router system, with a couple of units that act as a base station and satellite unit to provide corner-to-corner coverage for up to 5,000 square feet of home. It's really easy to install the system using the Netgear Orbi smartphone app so you can connect it over the Internet in minutes. The three-band coverage offers lightning performance thanks to technologies such as MU-MIMO and six internal antennas reaching speeds of up to 1,733Mbps in the 5GHz band and 833Mbps on the 2.4 GHz side. Orbi also works with Amazon's Alexa voice commands, and the smartphone app allows for parental controls powered by Circle. There is even the ability to create guest Wi-Fi networks, as well as connect new devices. What we like the sleek design of Wi-Fi 6 supports excellent performance What we do not like Pricey Ethernet ports is a little too close If you want to invest in a router that will keep you ahead of the technological curve, then you will want a router that supports Wi-Fi 6, the latest standard of 802.11ax, which not only offers better performance, but also manages large networks of devices much more efficiently. Even if your computers and game consoles are not yet ready for Wi-Fi 6, the RAX80 still provides up to 2,500 square feet of coverage for your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your bands, respectively, thanks to four antennas embedded in your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and older 2.4GHz devices with bandwidth of up to 4.8Gbps and 1.2Gbps in each of your 5GHz 802.11ac and 1.2Gbps in each of your 5GHz 802. and eight simultaneous 160MHz channels, A 64-bit 1.8GHz quad-core processor, more devices can use maximum Wi-Fi speed at the same time, so you don't need to worry about your family members or roommates slowing down your connection. It's also more than able to handle even more trick-out smart homes, and thanks to WAN port aggregation, it can even handle Multi-Gig internet plans up to 2Gbps. Good to know Wi-Fi 6, also known as 802.11ax, is still a fairly new standard, so not all of your devices can still support it, but it's worth upgrading your computers or game consoles if you have a lot of devices on the network or just want maximum performance for things like games. What we like solid Tri-Band Wi-Fi Simplified to set up Easy Guest Access What we don't like Netgear Nighthawk X6 is integrated with Amazon Alexa voice command lines and features six external high quality antennas that combine with tri-band Wi-Fi to increase performance, and Netgear Smart Connect software works so that each device can connect to the strongest signal. Beamforming+ technology helps improve existing signals by directing unused bandwidth directly to each connected device. The X6 is simply smiling at online to your home network with just a few taps. With a total speed of 3.2Gbps across the 2.4GHz and 5GHz 802.11ac bands, the X6 is simply smiling at online games or 4K streaming. What we like about highly configurable players Good 2.4GHz performance Easy setup What we don't like Poor longer range performance Pricey One of the best viewed gaming devices on the network to get the best signal possible, and for any additional bandwidth to eliminate backlogs. The game panel helps display real-time bandwidth usage, so users can help reduce ping time, and gaming VPNs allow direct communication with any VPN client to maintain hardware performance and support online gaming traffic needs. With four external antennas to increase signal strength, the XR500 adds MU-MIMO and Quad-Stream technologies to further increase gaming. Add in a total network speed of 2.6Gbps across the 2.4GHz and 5GHz bands and you've found a gaming router worthy of your price tag. What we like the solid 802.11ac performance advanced features like QoS Inexpensive What we don't like Compatible with 802.11ac, Netgear Nighthawk R6700 provides speeds of up to 450Mbps on the 2.4Ghz band and up to 1300Mbps on the 2.4Ghz band and up to 1300Mbps on the 5GHz band and up to 1300Mbps on the 5GHz band. with the latest software to update security and performance. Compatible with Amazon Alexa and Google Assistant for voice command use, Nighthawk has dual-core processors inside that provide hardware to help maintain stable performance. Three external high-performance antennas can be directed to areas of the device (i.e. desktop or TV) to improve signal strength and range. What we like is the high range Good 5GHz performance Two USB 3.0 ports What we don't like If you're a big streamer you'll want to take a closer look at the Netgear Nighthawk X4S. With speeds of up to 800Mbps in the 2.4Ghz band, the X4S adds Dynamic QoS for lag in gaming, plus stable 4K video streaming. The inclusion of MU-MIMO technology provides even more signal stability during 4K video streams, directing performance across devices using higher bandwidth to maintain signal strength. Setting up the X4S is extremely easy with a downloadable smartphone app, so users can be created and run within minutes of the first X4S connection to the home network. The four high-profit external antennas are paired with Netgear Beamforming+ technology to increase the range and strength of the signals, which is convenient for any house of medium and large size. What we like about 10 Gbps SFP + port fiber and NAS connectors Ultrafast 802.11ad maximum speed When it comes to performance at a price, Netgear Nighthawk X10 is more than equal to the task. With eye-popping speeds, the X10 is one of the fastest routers, with a 60GHz 802.11ad connection that allows you to reach speeds of 4.6Gbps on the 5Ghz band, while also offering support for more shared 802.11ac devices at speeds up to 1,733Mbps. Internal hardware is driven by a quad-core 1.7GHz processor that handles 4K streaming, VR games, web browsing, and almost everything. The inclusion of Dynamic QoS provides additional performance enhancement, prioritizing bandwidth availability by applying and directing any unused signal strength during bandwidth heavy tasks, offering higher gaming and 4K streaming speeds. Additional add-ons include MU-MIMO, which supports simultaneous communication and helps you double the speed of Wi-Fi for mobile devices. The X10 also has a built-in Plex Media Server that can share media content from external hard drives connected to one of the two USB 3.0 ports or even a high-speed NAS device connected to a 10Gbps SFP+ port. Good to know WiGig 802.11ad network adapters, you won't be able to take advantage of Activity. FAQ How long does Netgear routers take?
